To whom it may concern

I have had the opportunity to get in touch with Genetracer Biotech to be provided with exome sequencing service for a research project on patients with intellectual disability, and I'm having an excellent experience working with their technical staff. They are very involved in the project and work with high quality providing a very fast service

A handwritten signature in black ink, appearing to read "M.I. Tejada". The signature is written in a cursive style with some overlapping loops.

Your sincerely

Dra. M.I. Tejada (Genetista, PhD).

Jefa de Grupo de Investigación del IIS BioCruces y del GCV-CIBERER.
