

12th November 2015

To whom it may concern,

It is my pleasure to write this letter of recommendation to GeneTracer Biotech.

We had the opportunity to work with GeneTracer Biotech performing a RNA-seq analysis with the Ampliseq Transcriptome Human Gene Panel. The analysis was performed using a very low amount of partially degraded RNA from urine samples. We were given an excellent advice on experimental design and a very fast service. They are very adaptable in order to fulfill the needs of the researcher. We will definitely repeat in the future.

Yours sincerely,

Lourdes Mengual Brichs, PhD  
Head of Laboratory of Urology  
Hospital Clínic  
Barcelona, Spain
